

Welcome note

Dear friends,

The Sharrard Society was formed in 2006, as a group of Sheffield Children's Hospital ex-fellows, together with their teachers and mentors. Colleagues who shared common inspirations, ideals, approaches to the paediatric population and the means of its orthopaedic treatments.

This is how the idea of a "SharrardSociety week" was born last year in Sheffield during the Hip Course. Crete was presented as an ideal destination of culture and tradition as well as natural beauty.

The "Chania Ortho-Topics 2015" meeting is an all-day seminar, privileged to include distinguished speakers from Greece and all over the globe.

It is a unique chance to listen and discuss with them while they take us through their knowledge and experiences. It is a rare occasion to share and absorb ideas on the cutting edge of Orthopaedics today! Topics are naturally more on the paediatrics side, but hot topics on Foot and Ankle as well as Trauma are included.

Hopefully all of you, Orthopaedic Surgeons, Paediatricians,

Physiotherapists, Nurses and everyone else attending this seminar, will make it a memorable event and a promise for the future!

Babis Konstantoulakis: Consultant Orthopaedic Surgeon Chania General Hospital

John Anastasopoulos: Head of Ortho Dept., "Agia Sophia" Children's Hospital

Scientific Programme , Sunday 25 of October

1st session: Research/Trauma

9.00 - 11.00: Moderators: Babis Konstantoulakis, Chania / Nick Gavalas, Chania.
